camporoso gavi

varietals: Cortese
region: Piedmont, Italy
vintage: 2016
farming practices: sustainable

notes

For Stefano Massone, the land of Gavi has been part of his life ever since, as a child, he began to follow in his father's footsteps. Day after day, season after season, he gives everything to his vineyards and to his work with which he is in love.

Gavi is located in the part of Piedmont known as Monferrato, where soft hills follow one another up to the Apennines and the sea. Vineyards, woods and fields offer the sight of a green and rich territory whose wine production is characterized by the Cortese grape variety .

The influence of the wind coming from the sea of nearby Liguria, the characteristics of the soil and the skillful daily care of the vineyards allow us to produce wines with delicate aromas and an elegant and fresh taste.

Fifteen vineyards extend over six municipalities in the DOCG area , with different soils, alternating between white and limestone lands and red and clay soils. The different location of the vineyards allows to limit the consequences of climatic adversities and to guarantee, year after year, a high quality level of the wines. For 40 years these differences have been valued to obtain different qualities of Cortese grapes, carefully vinified in the company's modern cellar.

crisp, elegant, and steely, with bright acidity and a fresh, delicate nose

obsessio garnatxa

varietals: Gren85% Grenache and 15% Samsó
region: Montsant, Spain
vintage: 2016
farming practices: organic

notes

Wines are like your children. You love them all for whatever their personality may be, as long as you respect them, they always respond. – Joan Ignasi, winemaker

An integrated Green-Winery concept for the entire winemaking process, ranging from organic vineyards, bioclimatic architecture and green technologies, helps minimize the effects on landscape, fauna and flora, and avoids modifying ecosystems and habitats.

Joan strives to make honest wines that express the spirit of their environment.
